### TURNING YOUR BRIGHT IDEAS INTO REALITY

# GET SELF-SERVICE MAGIC
## WE HELP YOU MAKE SAP PORTAL SING.

## BOWDARK SAP PORTAL PACK

Your internal and external users are not all in the same physical location. They're out in the world, making your business run. Enabling business processes with technology should reflect the real world: suppliers and customers should be able to update their status with you directly, contingent laborers should be able to on-board easily, and employees deserve self-service timesheets and leave requests.

The Bowdark SAP Portal Pack brings it all together. We set up SAP Business Technology Platform (BTP) to handle secure authentication. We connect the pieces of your environment to BTP to facilitate simple, beautiful, branded portals – filled with the right apps and information to empower your partners. Make better decisions with timely data from self-service portals.

## KEY BENEFITS

- **Enable and simplify external data entry**
- **Reduce TCO**
- **Give people Bring Your Own Device freedom**
- **One-stop shopping for work apps**
- **Transact on the go**

# WHAT'S INCLUDED

## 01
### ROADMAPPING
We identify the apps and services to hook into the portal, right-size and set up SAP BTP, and advise enterprise teams on best portal practices. You get a fully enabled and documented SAP Portal powered by SAP BTP.

## 02
### PILOT PROJECT
Seeing is believing. We take your connected SAP BTP Portal and give it the full theming treatment, showing by example how visual branding brings the self-service experience home. You get your first portal app, themed and deployed.

## 03
### OPERATIONALIZATION
To get the best results, great skills need to match with great processes. We set up projects for repeatable deployments with Visual Studio Code and Azure DevOps Services. You get portal deployment patterns that are maintainable yet flexible.

## 04
### TRAINING
Getting your team up to speed in new technologies is vital to reimagining your SAP Portal process. We lead a week of intense up-skilling that leaves your team ready to tackle new challenges head-on.

## 05
### ARCHITECTURAL SUPPORT
To get the best results, great skills need to match with great processes. We set up projects for repeatable deployments with Visual Studio Code and Azure DevOps Services. You get portal deployment patterns that are maintainable yet flexible.
