

FastTrack

Accelerating Your Shift to an Agentic Enterprise

Are Your Systems Helping Your Team, or Holding Them Back?

- Business demands keep rising, but capacity doesn't
- Manual handoffs create hidden bottlenecks
- Inconsistent processes introduce rise and rework
- Your systems report problems, but people fix them
- High-value talent is buried in low-value work
- Innovation gets deferred because operations consume everything

"If you're not embracing technology to deliver value to your customers, then you're losing out to someone who is."

- Duncan C. E. Winn

OUTCOMES

What This Engagement Delivers

01 An established Microsoft Copilot Studio Landscape

02 Live production-grade agents supporting the business

03 Understanding AI capabilities

04 Governance and security guardrails to run with confidence

05 A trained staff of product champions to promote usage and adoption

06 A roadmap to drive long-term expansion

What's Included?

Copilot Studio Landscape

A production-ready Copilot Studio landscape aligned to enterprise architecture, security, and integration standards.

2-4 Production Ready Agents

Deploy 2-4 enterprise-grade agents integrated with core systems for immediate business impact.

Skills Enablement & Training

Role-based training for IT, makers, and end users to manage and scale agent capabilities.

AI Opportunity & Use Case Roadmap

Facilitated workshops to identify and prioritize high-impact agent use cases, resulting in a 6-12-month adoption roadmap.

AI Governance & Security Framework

Defined governance guardrails for responsible AI adoption, aligned with security and risk standards.

Enterprise AI Foundation & Scale Plan

A scale-out plan defining operating model, ownership, support, and expansion strategy.

Executive-Level Benefits

Grow capacity without increasing payroll

Move from reactive reporting to proactive execution

Eliminate bottlenecks caused by manual handoffs

Improve speed, consistency, and accountability

Unlock higher-value work for your people

Build the foundation for a scalable digital workforce
