

FastTrack

Turning Scattered Data into Actionable Intelligence

Is Your Data Working for You, Or Against You?

- Decisions are still being made by gut feel
- Data is locked up in application silos
- Poor data quality and low trust in reported numbers
- Manual reconciliation and reactive reporting

- No line of sight on day-to-day operations
- Opportunities go unnoticed and slip through the cracks
- Conflicting reports and spreadsheet workarounds
- AI ambitions without a solid data foundation

"Data is the new oil. Like oil, data is valuable, but if unrefined, it cannot really be used."

- Clive Humby

What This Engagement Delivers

In **3-4 Months**, You'll Have:

01 A live Microsoft Fabric production environment

02 All your data together under one roof in OneLake

03 Curated data models and reusable data products

04 Foundation for self-service analytics

05 A defined governance and security model

06 A roadmap for AI and real-time intelligence

What's Included?

**Installation of
Fabric Landscape**

**2-4 Production-Quality
Power BI Dashboards**

**Curated Data Models for
Self-Service Analytics**

Data Integration

**Customized Report
Theme & Templates**

**Fabric Rollout
& User Adoption**

Executive-Level Benefits

- Faster, more confident decision cycles
- Productivity gains without headcount growth
- AI-ready data foundation
- Real-time operational visibility
- One trusted version of the truth
- Reduced compliance and reporting risk
- More accurate forecasting
- Lower long-term technology costs

**25
Years'**

Experience Building
Enterprise-Grade
Solutions

**Strong
Knowledge**

of Data Integration
Technologies

**Proven
Delivery**

Approach for
Agentic AI
Rollout Projects

**Human
Centric**

Approach to
Report Design

Ready to Become Data-Ready?

Schedule a 60-minute executive briefing to assess your data landscape and determine whether the Fabric FastTrack is right for your organization.
